

Healing Paws was recently featured on an episode of The Rhode Show on Fox Providence. The piece focused on the importance of rehabilitation to improve the health and function of pets suffering from chronic conditions or after an injury or surgical procedure.

Dr. Corey shared some of the transformative treatments that we perform every day for our furry patients, like heat therapy, massage, acupuncture and the hydro treadmill. Two of our patients, "Dottie" and "Sheba" made their live television debut as well strutting their stuff on the treadmills!
